Education

Techno International Newtown

Aug. 2024 – Jul. 2026

Master of Computer Application (CGPA: 7.30)

Kolkata, West Bengal

Marksheet

Guru Nanak Institute of Technology

Aug. 2021 – Jul. 2024

Bachelor of Computer Application (CGPA: 7.97)

North 24 Parganas, West Bengal

Marksheet

Dum Dum Sree Arabinda Vidyamandir

2019 - 2021 (WBCHSE)

Science (Percentage 66.66)

North 24 Parganas, West Bengal

Marksheet

Laban Hrad Vidyapith

2018 - 2019 (WBBSE)

(Percentage 49.86)

North 24 Parganas, West Bengal

Marksheet

Relevant Coursework

- Machine Learning
- Software Methodology
- Python
- DBMS
- Data Structures
- OOP With Java
- Artificial Intelligence
- Networking

Experience

National Institute of Industrial Training

July 2025 – August 2025

Data Science and Business Analytics Internship

Salt Lake Sector V, West Bengal

Certificate Link

- Trained in Data Analytics using Numpy, Pandas, Matplotlib and Seaborn.
- Built Stock Market Prediction and House Price Prediction related projects.
- Performed web scraping using Python to collect and process structured data.
- Collaborated using Git/GitHub and optimized applications through debugging and testing.

Euphoria Gnex

June 2023 – September 2023

Machine Learning Intern

Salt Lake Sector V, West Bengal

Certificate Link

- Worked with Supervised, Unsupervised, and Reinforcement Learning techniques in real-world applications.
- Developed an AI-based Cheating Detection System for online exams using Python and computer vision.
- Automated test workflows by creating Python and PowerShell scripts for organizing XML results and deploying builds.
- Used Jenkins CI/CD pipelines to run daily tests and generate automated performance reports.
- Created simple web-based dashboards using HTML, JavaScript, and CSS to visualize test metrics.

Institute of Intellectual Information

September 2022 – March 2024

Full Stack Developer Training

Dum Dum, West Bengal

Certificate Link

- Trained in full-stack development using PHP, HTML, CSS, JavaScript, Bootstrap, Django, and Python.
- Built responsive websites and backend modules including form handling, authentication, and dashboards.
- Performed web scraping using Python to collect and process structured data.
- Collaborated using Git/GitHub and optimized applications through debugging and testing.

Projects

Quantitative Stock Market Prediction | *Data Science, ML*

Advanced Research Project

Apr 2025 – Present

Institute of Industrial Training

Documentation Link Github Link

- Designed and implemented quantitative models for stock price prediction using machine learning techniques such as Linear Regression, LSTM, and Random Forest.
- Performed data collection, preprocessing, and feature engineering on historical market data including OHLC prices, volume, and technical indicators.
- Applied time-series analysis and statistical methods to identify trends, volatility, and market patterns.
- Evaluated model performance using metrics like RMSE, MAE, and accuracy, and optimized results through hyperparameter tuning.
- Visualized predictions and market insights using Python libraries such as Matplotlib and Seaborn for decision support.

Livestock Breed Identification Using Deep Learning | *Python, Deep Learning*

Advanced Research Project

Apr 2025 – Present

Techno International Newtown

Github Link

- Developed an AI-based cattle and buffalo breed identification system using deep learning and computer vision techniques.
- Trained and optimized CNN models using TensorFlow and Keras for accurate breed classification from image data.
- Designed a scalable backend using Python Flask to serve real-time predictions through RESTful APIs.
- Built cross-platform user interfaces using React (Web) and React Native for Android and iOS compatibility.
- Improved model performance through data preprocessing, augmentation, and hyperparameter tuning.

Dynamic Quantum-Secured Network Slicing for 6G | *Python, AI/ML, QKD*

Advanced Research Project

Apr 2025 – Present

Techno International Newtown

Paper Link — Google Colab

- Developing a quantum-secured network slicing framework for 6G using Quantum Key Distribution (QKD).
- Applying AI/ML for dynamic resource allocation and threat-aware orchestration.
- Integrating heterogeneous systems including IoT, satellite, edge, and mobile networks.
- Improving QoS by reducing latency and optimizing throughput using intelligent slicing.

AI-Based Plastic Segregation System Using IOT | *Python, IoT, ML, DL*

MCA Major Hardware–Software Integrated Project

Sept 2025 - Present

Techno International Newtown

Paper Link — Documentation Link — Github Link

- Designed an IoT-based plastic segregation system using sensors to automatically classify plastic types (e.g., PET, HDPE).
- Developed real-time data processing and device communication using microcontrollers and Python.
- Built a web dashboard for live monitoring, analytics, and segregation status visualization.
- Integrated cloud storage (SQL) for logging sensor data and system performance.

Real-Time Cheating Detection System | *Python, AI, Face Recognition*

BCA Major Project

Apr 2025 – Present

Guru Nanak Institute of technology

Documentation Link — Github Link

- Developed a real-time AI-based cheating detection system using Python, computer vision, and face recognition techniques.
- Implemented face detection and recognition to verify candidate identity and detect the presence of multiple individuals in the exam environment.
- Integrated head movement, eye gaze, and mouth movement analysis to identify suspicious behavior during online examinations.
- Incorporated audio-based sound detection to monitor background noise and detect unauthorized verbal communication.
- Designed an automated alert and image capture mechanism to log violations and generate evidence-based reports.

Technical Skills

Languages: Python, Java, HTML/CSS, JavaScript, SQL, Cloud Computing, Web Scraping, Data Structure, Object Oriented Programming

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio

Technologies/Frameworks: Linux, React JS, GitHub,

Certificate

Technical Certificates: NPTEL IoT Certificate, Code Clash, TINT Coding Contest, Oracle Foundations Associate, Hacker Rank,

English Certificate: Wadhwani Foundation Certificate

Leadership / Extracurricular

Bharatiya Antariksh Hackathon (ISRO)

2025

Team Leader — Project Development

Techno International NewTown

Certificate of Acknowledgement

- Ideated and submitted a solution for a space-technology challenge.
- Showcased innovation and analytical thinking.

Smart India Hackathon(SIH)

2022, 2023, 2025

Team Leader — Project Development

Guru Nanak Institute of Technology

Certificate of Acknowledgement

- Led a team of developers to design and implement an innovative solution for the SIH problem statement.
- Coordinated tasks, assigned responsibilities, and ensured timely completion of project milestones.
- Demonstrated leadership, teamwork, and problem-solving skills under strict deadlines and competitive conditions.
- Presented the project to judges, highlighting technical feasibility and real-world impact.

JIS Samman Sports Event

2023

Kabaddi Team — Runners Up

Guru Nanak Institute of Technology

Certificate of Acknowledgement

- Achieved Runners-Up position in Kabaddi at the JIS Samman inter-college sports competition.
- Collaborated with team members to train, strategize, and maintain peak performance throughout the tournament.
- Demonstrated teamwork, discipline, and leadership under competitive and high-pressure conditions.

Declaration

I hereby declare that all the details provided above are true and correct to the best of my knowledge and belief.
